Custom Autosound Audio System

Upgrading Classic Camaro Sound One Radio At A Time!

Camaro In-Dash Audio Systems

Custom Autosound CONCOURS Series radios allow you to keep the classic look of your Camaro's dashboard, get great sound and have direct connection to today's modern electronic devices. Each CONCOURS radio is custom designed and engineered to fit your dash for a "factory look." The 1967-68 radios include an original-design radio faceplate bezel in walnut or black. A center blockout trim in the 1969 radios gives a perfect finish to their installation. Each will install without any modification to your original dash and come with reproduction GM-style knobs. CONCOURS USA-5 and USA-6 radios control all functions of the Custom Autosound 10-disc CD Changer directly from the buttons on the radios and don't use FM modulators that can degrade the digital sound quality. They interface with Custom Autosound's iPod and USB adapters to take full advantage of the latest digital memory technology.

CUSTOM AUTOSOUND CONCOURS SERIES USA-230

This AM/FM stereo radio offers great value at an affordable price. It has amazing sound and you can play your music from the latest digital devices. QA1 STOCKER STAR SHOCK ABSORBERS

From cruising to racing, these shock absorbers are the ones to have on your Camaro. Even sitting still, they're winners with their bright anodized, machined aluminum body. Adjustable, bolt-in performance though, is their real value. These shocks have a 5/8" piston rod, an advanced 3-step sealing system and polyurethane bushings, but best of all is their on-car adjustability. The single adjustable shocks have 12 valving options with one knob that changes compression and rebound simultaneously. The double adjustable shocks have two knobs to set 24 positions of compression and rebound independently for 576 valving options. These versatile shocks cover the full spectrum of Camaro activities from car shows, cruising, autocross, road racing and drag racing all in one easy-to-adjust package.

67-69 GOODRIDGE STAINLESS STEEL BRAIDED DISC BRAKE HOSE KIT

Upgrading your Camaro with this stainless steel braided disc brake hose kit has three main benefits. Brake pedal firmness

improves since these hoses do not expand under pressure and are unaffected by brake system temperature. The corrosion-resistant stainless steel braid protects the hoses from cuts and road debris. And the great appearance of the braided hoses are direct replacements for the original rubber hoses that attach to the front disc brakes and the original rubber hoses that attach to the front disc brakes and the live rear axle housing. They conform to Federal Motor Vehicle Safety Standard Number 106.

How do you choose the correct speedometer gear? Drive at a steady 55 MPH on a road with mile markers.

Record the time in seconds it takes to pass two consecutive mile markers. Use chart to find the number of teeth you need to change from your present gear.

Note: Negative numbers indicate fewer teeth than current gear.

The Benefits Of Factory Fit Wiring

If you are restoring or modifying your Camaro, one of the most important safety features your car needs is a wiring system that is in good working order. Years-old wiring that has been spliced, altered, is dry-rotted or in generally poor condition could lead to an untimely breakdown or much worse, a disastrous fire. For safety and functionality, replacing your old wiring harness with a new reproduction or upgraded harness is a very smart investment. Rick's offers the best in wiring harnesses for your Camaro. Each harness is manufactured in the USA according to GM specifications, assuring an authentic look and precise connection to all electrical components. Reproduction wiring harnesses have the correct gauge wires, color-coded to match the factory wiring diagram. Each wire has the exact length required and wiring terminals are crimped-on just like the originals. If specifications call for it, the terminals are also dip soldered to limit resistance voltage loss. Hand-assembly of the harness is completed by wrapping the wires with correct, non-adhesive or cloth woven tapes, where applicable, providing a factory-installed appearance. Be safe, not sorry with show-quality, wiring harnesses in your Camaro.

CONSOLE GAUGE CONVERSION HARNESS

Tech Tip (Fixing Rally Sport Headlight Woes)

One of the best looking features, besides the cowl hood and rear spoiler on 1967-69 Camaros, was the hideaway Rally Sport headlights. It is also one of the most problematic issues for first gen owners. The most common reason the headlight doors do not open is because of vacuum leaks. Rather than troubleshoot the leaks one by one it is usually less frustrating and easier to simply buy a new kit and have a trouble-free system in place once and for all.

ALUMINUM!

Make your '69 Camaro a true light-weight with these new, incredible aluminum body panels! Fits just like the original steel panels, and even look the same on the inside. Save precious pounds (over 125!) when you install AMD's Aluminum Fenders, Cowl Hood (23 lbs!), Header Panel and Front Valance panel. Aluminum Deck Lid and Front & Rear Bumpers available too! Have the same kind of advantage as the Detroit factories did with their "A-FX" super stock cars of the early '60's, such as the Legendary Z-11 409 Chevy's and lightweight Dodges & Plymouths. High-quality Aluminum Camaro Body Panels are EDP coated, look just like steel (they just weigh a lot less)! The EDP coating makes a terrific primer, so there is no need to remove it before painting. The high strength premium aluminum sheet metal used to form these panels is surprisingly strong, and will hold up very well on your car. Bumpers available polished anodized or paintable. Call now for full details and pricing on the most awesome new body parts for Camaros ever made!

HOW TO CHOOSE YOUR SHEETMETAL

There are several levels of quality in Camaro sheetmetal available today. Rick's guarantees there is no finer sheetmetal available anywhere and we'll tell you who makes it and how good it is!! You choose the quality stamping that meets your needs and budget!

"Show Quality" - Made in the USA

The very best. Crisp and sharp stampings, concours quality. Perfect fit. For those who like to do it right!

"Quality Reproduction" - Made in the USA

Quality American made replacement sheetmetal. Stampings not quite as sharp as original. Perfect fit. Usually what everybody else offers as top of the line.

"Quality Reproduction" - Imported

Quality imported reproductions, each piece carefully selected from the several manufacturers available. Excellent quality at great prices.

Tech Tip

Please note; to use Quanta reproduction engine belts requires the use of correct pulleys and brackets. The depth of the groove in the pulleys and the adjustment in the throws of the pulleys must be correct to ensure the belts fit properly and do not get thrown. As you might expect, Rick's has a great offering of reproduction belts and pulleys to satisfy your needs.

TECH TIP

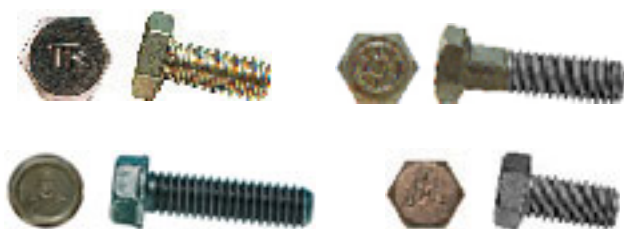

Whenever installing a new camshaft always use new lifters, no exceptions, unless you want to run the risk of flattening a new cam and then have all of the metal particles circulate through the engine. Whenever reusing an old camshaft and lifters always be sure to put the lifter on the same lobe it came off of because it has worn a pattern on that lobe, again, no exceptions unless you want a flat camshaft. Most people never think twice about reusing old pushrods, however, before you do it is vitally important that you make sure they are not bent and that the oil passage is clear. To make sure the pushrod is not bent simply roll it on a thick piece of glass or similar flat surface. It will be immediately clear by sight if it is straight or bent. To be sure the oil passage is clear use a parts washer to run a stream solvent through the passage. If it doesn't pass both of these tests it's time to buy a new pushrod.

302 (Z-28) SMALL BLOCK PISTONS

HI-TECH HYPEREUTECTIC HIGH PERFORMANCE PISTONS

302 (Z28) small block pistons are fully designed, tested and certified by a QS-9000 & ISO-9001 OE manufacturer with 30 years experience in piston manufacturing for the OE's and the performance racing market. Cast with 16-18% silicon alloy, hypereutectic pistons are T-6 hardened, suitable for even very high performance applications. Precision machined super high performance piston with original dome design for all 302 engines, stock compression ratio (11:1 with 64 cc heads). New tooling was specifically made for our pistons and specific machining cams were produced to accurately machine the profile and taper. (Many manufacturers just have a few generic cams and they pick the closest one). Each alloy batch is independently tested and certified before casting and then hardened to specs under computer control.

EXCLUSIVE engineered under structure allows dome machining (0.143") to safely reduce the compression ratio to 10:1 and maintain balance. Free-floating wrist pin and spirolock retainers included. Sorted in sets of eight by size and weight to balance and blueprint tolerances. {+/- .0004" & 1.5 grams or better}.

Compare this warranty term to others! - two full years in street cars. Individually plastic sleeved after factory sorting and shipped in special four divider boxes.

FILTERMAG MAGNETIC OIL FILTER SYSTEMS

Finishing the job your oil filter started is the goal of the FilterMAG system and oil analysis tests prove it. Typical oil filters remove particles as small as 25-40 microns, but it's the 5-20 micron size particles that cause 60% of engine wear. With a FilterMAG attached to the side of an oil filter, abrasive iron contaminants as small as 2 microns are removed from the motor oil by locking them in place on the inside wall with immense magnetic force. That same force holds the FilterMAG onto the filter housing. There is nothing to wear out and it carries the manufacturer's lifetime warranty. The heavy-duty system offers the ultimate protection with 600 lb. magnetic pull force. The light-duty system has 160 lb. magnetic pull force and is suitable for everyday, non-racing applications.

67-69 ALUMITECH ALUMINUM

PERFORMANCE RADIATORS

Expect a perfect fit, an original look and improved cooling when you install one of these aluminum performance radiators from Alumitech Reproductions. As a direct bolt-on replacement for the original Harrison brass/copper radiator, the Alumitech has 30% more efficient cooling and only about half the weight. Fully TIG-welded for maximum heat transfer and strength, it features two rows of 1" tubes and press-formed tanks that closely match the originals in appearance, except it doesn't have the factory embossed Harrison script. Supplied in a natural aluminum finish, Alumitech radiators can be painted black without adversely affecting their superior cooling properties. Proudly made in the U.S.A., four models are available to cool classic Camaros.

BE COOL DUAL ELECTRIC FANS MOUNTING KIT

Use these support bars and fabricate four custom brackets to attach Be Cool dual electric fans (P/N BC-500) to your stock Camaro radiator. This 2-piece aluminum mounting kit, when used with the Be Cool 4-piece bracket kit (P/N BC-300), allows bolt-on installation of the Be Cool dual electric fans to the Be Cool radiator (P/N BC-900).

67-69 STAINLESS STEEL THERMOSTAT HOUSINGS

"Trick" doesn't begin to describe this thermostat housing.

Made from machined type 304 stainless steel and available in either natural or polished, the ultra low profile design allows clearance for Ram Jet or blower applications. The innovative 15-degree angle neck, sealed with an O-ring, swivels a full 360 degrees to align perfectly with the radiator hose. A second O-ring seal prevents any coolant leaks at the intake manifold. Stainless steel mounting bolts complete the super sanitary installation on either small or big blocks.

67-69 RACING POWER SMALL BLOCK ALUMINUM INTAKE MANIFOLDS

Improve the off-idle response and low-end torque of your stock small block Camaro with

the Racing Power intake manifold. With or Without changing to a performance cam and/or headers, this intake allows the engine to pull strongly up to 5,500 rpm. And for an easy conversion, the stock Quadrajet carburetor bolts right in place with no changes required. you can choose your engine's appearance by selecting natural, polished aluminum or a smooth ceramic-coated finish.

67-69 EDELBROCK PERFORMER SMALL BLOCK ALUMINUM INTAKE MANIFOLD

Get an ideal performance intake manifold with this Edelbrock Performer. It

dramatically improves the off-idle response and low-end torque of your stock small block Camaro. Whether or not you change to a performance cam and/or headers, the engine will pull strongly up to 5,500 rpm and it's tuned for peak torque around 3,500 rpm. The original Holley carburetor bolts right in place with no changes required. You can gain even more performance by upgrading to a new 600 CFM carburetor. Great choices are the Edelbrock, P/N E-1406 or Holley, P/N H-80457. The Edelbrock PermaStar finish is a dark silver chrome powder coating for durability and easy cleaning, but won't oxidize, fade or discolor like traditional chrome plating.

67-69 EDELBROCK 600 CFM PERFORMANCE CARBURETOR

Improve your Camaro's small block engine performance and gas mileage over the stock

QuadraJet by using an Edelbrock 600 CFM square bore carburetor. It accepts the stock throttle linkage and automatic transmission kick-down mechanism, has a universal 12-volt electric choke, vacuum/weight operated secondaries, vacuum advance connection and PCV fitting. This carburetor will not fit on a stock QuadraJet intake manifold. For installation on Edelbrock Performer intake manifold, P/N INT-111, a new fuel feed line and adapter plate are required. We recommend using chrome-plated steel fuel line kit, P/N E-2731 and adapter plate, E-2732. Not legal for sale or use on pollution-controlled vehicles.

67-69 HOLLEY 600 CFM UNIVERSAL CARBURETOR

Install this Holley carburetor along with the Edelbrock Performer EPS intake manifold (P/N INT-111) on your small block Camaro engine for a great performance enhancing combination. Since the carburetor is an easy bolt on fit to the intake manifold, no adapter plate is needed. This carburetor features vacuum secondaries, single inlet fuel bowls with side-pivot floats, adjustable needle and seat, electric choke, PCV and distributor vacuum connectors. Not legal for sale or use on pollution controlled vehicles.

67-69 PERTRONIX IGNITOR ELECTRONIC DISTRIBUTOR CONVERSION KIT

Say goodbye to the old-fashioned, temperamental breaker points & condenser when you convert your Camaro's distributor to modern

electronic operation. These Ignitor components install in place of the points and use a simple two-wire hook-up. Everything is contained within the original cap, it never requires adjustment and there's a huge improvement in ignition dwell accuracy. This conversion works with any coil, but we recommend the chrome PerTronix Flame-Thrower coil, EP-724 for 40,000 volts of power and a dressed-up look. Note: Once the ignition switch is turned on, it takes 4 seconds to charge the electronic pick-up before starting the engine.

Ignition System

Distributors & Components

67-69 STREET & STRIP D.U.I. HEI DISTRIBUTOR

You'll enjoy driving under the influence of this Performance Distributors Davis Unified Ignition system. This hand-built, custom tuned replacement distributor combines an electronic Dyna-Module and 50,000-volt coil together in one neat package and provides an optimum advance curve. It gives your Camaro virtually maintenance-free, instant throttle response. Upgrade your big or small block engine with this extended rpm range, HEI-style distributor for superior street & strip performance. The simple electrical hook-up requires installing a new 12 ga. wire from a fuse block position that is "hot" when the ignition is on, directly to the positive side of the HEI coil on the distributor cap. Installation on a Camaro requires additional firewall clearance.

EP-725 67-69 Street & strip D.U.I. HEI distributor.....349.99 ea.

67-69 BILLET ALUMINUM SMALL BODY HEI DISTRIBUTOR

Modernize your Camaro's ignition system with this Procomp Electronics HEI distributor. As a replacement distributor for small or big block engines, this two-piece small body unit doesn't have the clearance problems of some replacement HEI distributors due to its external coil. With 50,000 volts, an electronic advance and an extremely accurate magnetic pick-up that never requires adjustment, it provides a hotter spark and more reliable, quicker starts than the original points & condenser set-up. The unique spark plug wire retainer top and CNC machined aluminum billet housing give a clean, high-tech appearance. The simple electrical hook-up requires installing a new 12 ga. wire from a fuse block position that is "hot" when the ignition is on, directly to the positive side of the coil.

67-69 RACING D.U.I. HEI DISTRIBUTOR

Want to upgrade your hi-performance or racing Camaro with an HEI distributor, but worried about a stock HEI's RPM limitations? That won't be a problem using a Performance Distributors racing version Davis Unified Ignition system. This hand-built, custom tuned, mechanical advance distributor combines a racing D.U.I. coil and Dyna-Module that only draws 2-3 amps of power, produces a long duration spark allowing plug gaps up to .050"-.055" and is capable of 9,000 RPM. It gives your small or big block Camaro instant throttle response, longer spark plug life and more horsepower. An easy drop-in installation, the simple electrical hook-up requires running a new 12 ga. wire from a fuse block position that is "hot" when the ignition is on, directly to the positive side of the HEI coil on the distributor cap. Installation on a Camaro requires additional firewall clearance.

67-69 PERTRONIX IGNITOR II ELECTRONIC DISTRIBUTOR CONVERSION KIT

Upgraded electronics allow the Ignitor II to sense the coil current level and use a powerful micro

controller to adjust the dwell accordingly. Ignitor II also develops up to 4x more energy between 3,000 and 5,000 rpm than standard ignition systems. This conversion works with any coil, but we recommend the chrome PerTronix Flame-Thrower coil, P/N EP-724 for 40,000 volts of power and a dressed-up look. Note: Once the ignition switch is turned on, it takes 4 seconds to charge the electronic pick-up before starting the engine.

67-69 LIVEWIRES SMALL BLOCK SPARK PLUG WIRE SET

Exhaust manifolds burning spark plug wires is a thing of the past with this LiveWires set. It withstands temperatures from -76°F to 1400°F using space age, heat resistant sleeving. Moisture and chemicals won't be a problem either. Designed for a custom fit over the valve covers, the 90° boots are already installed with no assembly required. The spiral wound core prevents electronic interference and each individual wire is numbered at both ends for accurate installation.

TECH TIP

For restorations and cars competing in judged events it's hard to beat having all the stamps and markings the factory used on your car while it was being assembled. If you're lucky you can simply duplicate what is on your car. If your car is missing its stamps and markings the best way to learn about the applications and exact locations is to consult with a local or national Camaro organization. A book outlining the material unfortunately does not exist.

1968 RS ELECTRIC HEADLIGHT DOOR KIT

DSE's RS Headlight Door Kit replaces the stock vacuum actuated system on an RS headlight equipped 1968 Camaro. It also makes converting your non-RS Camaro to hideaway headlights much easier. When installed, this kit will operate the headlight doors more reliably, smoother and without the complicated and bulky vacuum accessories. Vehicles with large cams and low vacuum signals will also benefit from this system. The RS Headlight kit uses current sensing technology to provide a system that needs no adjustment and is extremely safe. DSE has gone to great lengths to provide you with the highest quality, best engineered product available with the easiest installation and minimal modification to your vehicle. The kit comes complete with everything needed for installation including two electric actuators, a control module, harness, mounting brackets and hardware.

67-69 RS ELECTRIC HEADLIGHT DOOR KIT

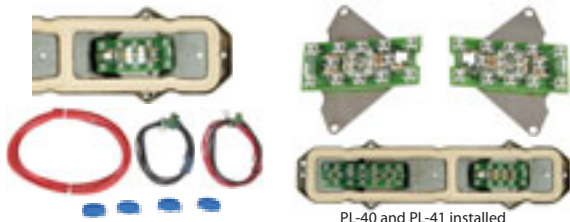

Luckman Industries replaced the undependable, complicated and expensive vacuum headlight system found on the 1968 and 1969 Camaros with a very simplified electric motor system. With a touch of a button, both headlight doors open or close simultaneously with a real smooth and dependable operation or choose to work them by your headlight switch (HK-6785, HK-695). Each kit includes one right and one left hand headlight housing with the motor plate, high efficiency motor, clutch unit and output arm installed. Factory style door stoppers with rubber bumpers and screws. A completely finished wiring harness that requires only two connections to make the unit work. One to the power block on the radiator support and the other to the ground located on the right hand fender. The rest is handled by the remote control unit. Packed with pictured instruction sheets and a 6 month manufacturers mail-in warranty card.

Griffin Radiators

High Performance Cooling

GRIFFIN ALUMINUM RADIATORS

Aluminum radiators do cool better than a copper brass radiator. An aluminum radiator with 2 rows of 1" tubes is equivalent to a copper brass radiator with 5 rows of 1/2" tubes! Aluminum provides high efficiency, is lightweight and has a longer life than copper brass.

Griffin is an integrated manufacturer, making the tubes, fins, headers, side bands, mounting brackets and tanks, controlling every step of the manufacturing process to produce high quality components that are performance matched for optimum cooling capability. Choose from two direct bolt in performance radiators specifically for your Camaro: The Pro Series - for 400 HP, and the HP Series - for up to 600 HP applications.

Note: Shipped FedEx Oversize Two Note: Griffin recommends a coolant that contains an aluminum protective additive. Generally the coolant to water ratio should be 50/50. Griffin doesn't recommend a 4 row radiator for street use because of high air side restriction, excessive fan power would be required to meet idle requirements. Griffin street radiators for Camaro use 2 row 1" or 2 row 1-1/4" tubes.

Note: Shipped FedEx Oversize Two

Polyurethane Suspension, Body & Engine Mounting

67-69 HYPER-FLEX CHROME POLYURETHANE MOTOR MOUNT

Energy Suspension's Hyper-Flex chrome and red polyurethane motor mounts

are compliant for everyday street use yet rugged enough for high torque racing applications and they look great besides. The upper and lower steel brackets wrap around each other without touching and are encapsulated by the molded polyurethane material. The safety interlock design ensures that the mounts will never pull apart under stress. A vast improvement over the original rubber mounts, these polyurethane mounts are virtually indestructible, impervious to automotive oils & chemicals and absorb vibration well. Two mounts are required.

Detroit Speed & Engineering - The Hot Look & High Performance Too!

DSE QUADRA-LINK, WITH SHOCKS & SPRINGS

This is a great way to upgrade from original leaf spring suspension. DSE's exclusive 4-link geometry design is uncompromised to achieve the best possible handling. The new DSE "Swivel-Link" (patent pending) allows the suspension to fully articulate with smooth solid motion and no binding. The best feature is that this is achieved without heim-joints. Heim-joints are noisy and prone to short-term life. The DSE QUADRA-Link utilizes tuned high-durometer rubber bushings (in place of heim-joints or squeaky urethane bushings). The long upper links provide great pinion and u-joint angle control. The kit utilizes a panhard rod that provides precise and effective rear axle lateral location during hard cornering. The panhard rod is adjustable as ride height changes for roll center control. The rear upper shock crossmember strengthens the rear body and frame section. Don't settle for anything less than DSE's QUADRA-Link rear suspension.

DSE COIL OVER SHOCK ABSORBERS

Shocks are ideal for use with Detroit Speed and Engineering's Coil Conversion. Manufactured by Koni, the DES-65 is far superior to twin tube shocks. Aluminum body mono-tube design provides 4-position rebound adjustability for the best balance between handling performance and ride quality. Intended to be mounted upside down in DSE conversion to low unsprung weight.

Flat Stoppers

Cars that sit for months in one place will create flat spot tires, it's a fact. You can prevent tire flat spotting by placing Flat Stoppers underneath your tires to insulate them from temperature extremes. The special lightweight polystyrene construction eliminates uneven pressure points regardless of how long your car sits. Put an end to ruining expensive tires.

Battery Tender

- Safe, Reliable, Trouble Free Battery Care
- Developed To Maintain Batteries Not In Constant Use Or Storage

Automatically switches off after fully charging to storage charge constantly monitors the battery without the damaging effects of trickle charging. The initial charge cycle of the Battery Tender brings a battery to a full charge at approximately 14.4 volts about 1.25 amps. After a full charge is reached, the Battery Tender automatically converts to a float charger and monitors the battery at 13.6 volts. Although there is a constant voltage of 13.6 volts being applied to the battery, it is doing so at very little or no current. What this means to the user is safe, reliable, trouble free battery care. Equipped with 6' power cord, and 6' output cord with clamps, 5 year warranty.

Battery Tender Waterproof 800 Charger

- Charges Battery & Maintains Proper Storage Voltage Without Damaging Effects Caused By Trickle Chargers

The Battery Tender Waterproof 800 is perfect for outdoor use. Its circuitry is totally epoxy encapsulated so it will perform even while submersed under water. The unit packs 800 milliamps of pure charging power yet it is no larger than the size of a standard computer mouse. You can use Battery Tender anywhere in the world (100-240VAC 50/60 Hz) and the unit is reverse polarity protected, spark proof and it complies to international safety standards (UL/CSA/CE). Like all Battery Tenders, it has a microprocessor (brain) that controls the charging of each battery so that your battery doesn't get "cooked" the way conventional chargers can do. This lightweight unit weighs only 1 lb. and carries a manufacturer's 2 year warranty.
