### 1963-67 WeatherShield® Car Cover

- "The" Ultimate Car Cover Fabric
- Repels Water Better, Keeps Car Drier, Packs Small And Light, Dries In A Flash

The WeatherShield® Car Cover manufactured by Covercraft is the standard in top of the line car covers. It keeps your Corvette dryer, is softer against your paint's fine finish, dries faster and breathes better than anything on the market today. Combine that with the fact that it has special UV inhibitors and you've got an unbeatable combination. Technically speaking the fabric is different because the one-layer fabric goes thru the Nextec® encapsulation process which non-technically speaking is the very best way to make an extraordinary fabric. In fact this process also gives this fabric a 9 out of 10 rating for simple dust protection too! The WeatherShield® cover has these quality features; double stitched seams, neoprene elastic front and rear for a snug fit and reinforced, non-scratch grommets for optional lock.

### 1963-67 Mosom Plus™ Cover

- Filters Out Dust
- Non Scratch, Soft Inner Lining
- Lightweight And Durable

Mosom Plus™ is a four layer material. The outer two layers are Spunbond Polypropylene, the middle layer is a special micro-porus film and the inside layer is super-soft fabric. The middle layer is an excellent rain barrier, while allowing for vapors to pass through. The special cotton flock inner layer pampers the most delicate paint finish. It is a great choice for all-around car cover use, suggested for most conditions except extreme sun, snow or ice. Mosom Plus™ is a non-woven material, so in the unlikely event a rip occurs in the material, it will not run.

## 1963-67 Aqua Shed Tri-Tech Gray Car Cover

- Protects Your Valuable Paint Finish, Indoors Or Out
- Custom-Fit • Three Layers Of Breathable Protection
- Water Resistant • Scratch-Proof Grommets
- Ideal For Indoor & Outdoor Use

A great value for the money, the Aqua Shed Tri-Tech 3-layer car cover from Eckler's is lightweight, breathable, totally UV treated and highly water-resistant. It protects the exterior from heat build-up, ultraviolet rays, dirt, sap and other pollutants while retaining the breathability needed to prevent paint deterioration. Soft on your Corvette's finish. The Tri-Tech car cover dries quickly and stores compactly. Each cover is custom-fit with a hemmed bottom, double stitching, elasticized at the front and rear for a snug fit. Scratch-proof grommets are built-in for an optional safety lock and cable. Protect your valuable Corvette the right way with an Aqua-Shed Tri-Tech car cover from Eckler's. Storage bag included.

## 1963-67 Aqua Shed Premier Tan Car Cover

- Best Water Repellency • Custom-Fit
- Four Layers: Bicomponent Strength Layers, Bicomponent Layer, Microporous/Breathable Barrier Film & Soft Bicomponent Spunbound Layers
- Scratch-Proof Grommets • Ideal For Indoor & Outdoors
- 5-Year Warranty

Looking for a superior car cover? The Aqua Shed Premier car cover is the best overall car cover you can buy! This unique 4-layer cover is manufactured using the newest, state-of-the-art production technology. Four high-tech materials are ultrasonically joined for multiple layers resulting in maximum

protection for your Corvette. The inner core is a soft spun-bound layer designed to preserve your beautiful paint finish. The second layer is made up of a microporous/breathable barrier. The third and fourth layers are bicomponent layers with the outer layer adding overall strength, UV resistance and durability to the cover. This combination results in an exceptionally high strength-to-weight ratio, with the "soft touch" necessary for today's water-based paint finishes. Scratch-proof grommets are built-in for an optional safety lock and cable. Protect your valuable Corvette with an Aqua Shed Premier car cover from Eckler's! Storage bag included.

## 1963-67 Aqua Shed Plush Gray Car Cover

- Excellent Water Protection & Breathability
- 4 Layers Protects Against Impacts
- Custom-Fit • Scratch-Proof Grommets
- Ideal For Indoor & Outdoor Use

The Aqua-Shed Plush car cover from Eckler's features a 4-layer polypropylene construction for maximum protection in all weather conditions. Acid rain, industrial pollutants, tree sap, and bird droppings will not harm the fabric. The unique 4-layer construction does an outstanding job of resisting moisture, while allowing air to circulate through the fabric. The fabric's 4-layer thickness absorbs impacts better than any other car cover fabric to help protect the finish from nicks, dents and scratches. Scratch-proof grommets are built-in for an optional safety lock and cable. Protect your valuable Corvette the right way with an Aqua-Shed Plush car cover from Eckler's! Storage bag included.

## 1963-67 Covercraft Form-Fit Indoor Car Covers

- Ideal Indoor Cover
- Excellent Dust Protection & Breatheability
- Exclusive Body-Hugging Fit

Covercraft's Form-Fit™ covers are ideal for protecting beautiful paint finishes. The inside fibers are 100% cotton terry loop, which are sheared to a fleece-like finish to provide a super soft feel. The outer shell of woven polyester has Lycra/Spandex® added to the yarn to give the cover an exclusive, body hugging fit unlike any other cover produced. And unlike other fabrics, Covercraft's material retains its shape over an extended period of time while the 7.4oz material helps provide cushioning against accidental dings. The Form-Fit™ cover is machine washable and carries a manufacturers limited warranty of 4 years. Storage bag included.

### Laser Shield® License Cover

- Diffuses Incoming Laser Beams
- Does Not Obstruct View Of License Numbers

Laser guns emit a laser beam which is bounced off a flat, perpendicular, metallic, reflective surface on your vehicle. This specially designed cover works to absorb and diffuse the incoming laser beam. Significantly shortens the effective distance of laser guns. Note: Buyer assumes all responsibility for using this product in compliance with local motor vehicle codes.

### The Super Protector® License Plate Cover

- Protects Your Privacy
- Blurs Numbers From Side View & Overhead
- Numbers Visible From Straight On View

How does "The Protector" work? Photo-radar and photo-laser operate at known angles to the direction of traffic flow. Using a passive, state-of-the-art light-bending lens, the camera is unable to see the plate numbers, and identify your vehicle. The license plate is still readable from straight on. Note: Buyer assumes all responsibility for using this product in compliance with local motor vehicle codes.

## 1963-67 Console Tunnel Insulation

- Greatly Reduces Cockpit Heat
- Fits Under Console Trim & Carpet
- Easy To Install

Now you can add insulation that incorporates today's technology in an easy to install insulation that doesn't require getting under the car. Simply remove the console trim, peel back the carpet and use 3M Spray Trim Adhesive. The insulation is pre-cut and it's larger than the stock insulation on 1963-67's to provide greater cooling and make your air conditioning more effective. Made of a fiberglass composite and joined to an aluminum skin.

## 1963-67 HushMat Floor Insulation

- Reduces Road Noise & Dramatically Improves Thermal Insulation
- Easy To Install-Just Trim, Peel & Apply
- 100% Butyl Blend, Aluminum Backed Material
- Super Thin Only 1/8" Thick • No Adhesive Required
- Easy To Form Shape & Apply To Inside Of Floor
- Insulation R Value 2.5
- Includes (20) 12" x 23" Insulation Tiles

HushMat insulation will keep the heat out, your air conditioning in and will greatly reduce exhaust, road, engine, rear end noise and vibration as well. Easy to install, HushMat is self-adhesive and will stick to any interior surface you apply it to. It comes in easy-to-handle squares instead of large, hard-to-handle rolls or sheets. Just fit, trim if needed, peel and stick. HushMat trims easily with scissors or a box knife so no special tools are needed. No need to spend time cleaning the surface it will be applied to as HushMat will adhere to most any surface with no cleaning or glue needed. It is constructed of 100% Butyl and aluminum with just 1/8" total thickness. It is far thinner than most other insulation products on the market, allowing it to be installed into tight cavities while still providing superior insulating power.

## Clock Restoration

- Step 1: Outer cases are glass beaded, inside and out.  
 Step 2: Inside is repainted.  
 Step 3: Outside is sprayed with a rust preventative sealant-not a paint. Retains the original finish.  
 Step 4: Bezels, lens retainers and pointers are repainted their factory colors.  
 Step 5: Clock movements are cleaned, inspected, worn parts are replaced, oiled and calibrated for proper time keeping.  
 Step 6: Clock faces are cleaned and polished.  
 Step 7: Clock lenses are buffed or replaced.  
 Clocks are then reassembled and tested for accuracy and reliability.

## Quartz Conversions

Same procedure as above apply except for installation of a new U.S. Made quartz movement.

## 1963-67 Moroso High Performance Spark Plug Wires

- For Use With Headers
- Custom-Fit For Corvettes

Moroso's "Blue Max" Spiral Core Spark Plug Wires should be used whenever headers are installed.

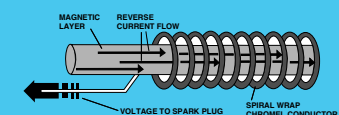

We've selected the Moroso brand for three very good reasons. First, they are made of the finest high temperature silicone available to withstand the extreme temperatures headers produce. Secondly, Moroso's unique 8mm "Spiral Core" design delivers the voltage carrying capability of a metal conductor with the radio noise suppression benefits of the stock wires, and these wires are routed just like the factory wires.

## 1963-67 ACDelco Spark Plugs

- OEM Plugs • Cuts Radio Noise

ACDelco has a "totally correct" spark plug for your Corvette's engine. Sure, others will work, but none will perfectly complement the ignition system.

ACDelco spark plugs are designed to achieve the optimum in engine performance when used in connection with ACDelco's total ignition system. In fact, the spark plugs even use a special resistance in the plug just for your engine so that radio interference is minimized. Insist on genuine ACDelco spark plugs!

## 1963-67 Petronix Ignitor III Electronic Ignition Conversion

- Replaces Points & Condensor With Modern Electronic Ignitor
- Completely Hidden Inside Your Stock Distributor
- Includes Adjustable Rev Limiter
- HEI Gives Improved Mileage And Horsepower
- Hugh Dwell Accuracy Improvement
- Magnetic Type Sensor Never Requires Adjustment
- Must Use Flame Thrower Coil P/N 42644 or 42643
- Simple Two Wire Hook-up

There's absolutely no need to contend with the technology of the 60's and before, when you can bolt-in today's electronic timing benefits in the form of the Ignitor! This system gives you a huge improvement in your ignition dwell. Plus the whole conversion remains under the stock cap so for restorers the car appears dead stock. Technically speaking, this ignition has rotating cobalt magnets which trigger an electronic switching module commonly referred to as a "Hall" effect integrated circuit. Practically speaking, this means you'll always have perfect dwell regardless of how high you operate in the RPM band.

## 1963-67 Breakerless Electronic Ignition Conversion Kit

- Single Wire Hook-Up Makes Distributor Look 100% Stock
- Eliminates Points

Convert any 1963 to 1967 GM V8 breaker point type distributor with a windowed type distributor cap to a reliable solid-state electronic ignition,

utilizing a fully integrated trigger and power module that fits completely inside the distributor. Unlike competitive systems, no additional wires protrude from the distributor, only the original points wire. The result is a state-of-the art ignition with an absolutely stock appearance. Emissions legal in all 50 states. No distributor modification, disassembly or removal is required for installation. 3-year warranty.

## 1963-67 HEI Distributor Conversion

- Converts Pre-1975 Vettes To HEI Ignition
- 2-Year Warranty

Each distributor is actually spun on a distributor machine with a super smooth advance curve. Buying an uncurved distributor is like buying an unground camshaft. A smooth curve insures maximum power and mileage while eliminating engine damaging detonation. The D.U.I. distributor produces a longer duration spark which allows you to open up your plug gaps to a whopping .055". The Dyna-Module and 50,000 Volt D.U.I. coil work together to give your engine the ultimate spark. A wider gap and a hotter spark leads to more complete combustion. NO add-on spark box is needed. Each D.U.I. distributor is hand-built not mass produced and is individually prepped. Housings are polished and lubed appropriately. Shaft plates are welded for durability. Gears are wire brushed and end play is adjusted with a feeler gauge.

Note: Use 51213 Plug Wire Set

## 1963-67 HEI Distributor Conversion

- Converts Dated Ignition Systems To Modern HEI Technology
- Easy To Install
- Improves Engine Performance

Now with a simple distributor swap you can get all the benefits of HEI technology plus performance enhancements on top of the original HEI. For example the original HEI had a 38,000 volt module, pickup and coil, this unit provides 50,000 power packed volts! The original system had bushings in the housing, this model has needle bearings for smoother operation and longer life. Plus, this one-piece distributor has a 4340 hardened steel cam gear for use with all roller cams and brass terminals in the distributor for greater conductivity than the stock aluminum terminals. So when you compare this tach drive distributor to what your car came with you're getting a tremendous hi-performance distributor that eliminates the points and coil and gives you all the firepower you need for your Corvette's ignition. This unit simply bolts into place, all you have to do is run a 12 volt power lead to the distributor and add upgrades.

## 1963-67 MSD Tach Drive Distributor

- Convert To Electronic Ignition
- Retains Original Tach Drive

Replace your worn out, outdated points distributor with MSD's electronic, magnetic pickup unit. CNC machined from 6061-T6 billet aluminum this distributor features ballbearings and sintered steel bushing shaft supports for long lasting performance. The mechanical advance is fully adjustable allowing for customized spark curves. Its magnetic pickup never needs adjusting and plugs directly into MSD's high performance ignition boxes. The vacuum advance feature is maintained for driveability and full economy, and its tach drive accepts the factory tachometer cable. An optimized spark curve combined with a stronger more consistent spark results in improved fuel economy, increased reliability, and smoother more powerful engine performance. **Must be used in conjunction with a MSD ignition box.**

## 1963-67 Mallory Unilite Electronic Ignition Distributor

- Maintenance Free Operation

The Mallory Unilite Electronic Ignition Distributor is now considered the industry standard.

The device is triggered by a photo optic infrared LED that never wears out for dependable, accurate timing. This unit replaces the original distributor with a simple three-wire connection. Self-lubricating bushings provide long shaft life, while the high dielectric strength cap and rotor/shutter wheel combination prevent voltage leakage. An adjustable advance curve allows you to tune for performance. Tach drive connection. Not legal in California on pollution controlled vehicles. Also available as a points style distributor.

## 1963-67 Dura-Last Tach Cross Gear Kit

- With OE Distributor
- Eliminates Tachometer Failure
- Won't Destroy Mainshaft Gears
- Stainless Steel Or Bronze Construction

Before your stock tachometer drive gear destroys the distributor mainshaft, replace it with our Dura-Last Tachometer Cross Gear Assembly manufactured by High Tech Innovations. The factory tachometer drive gear doesn't get adequate lubrication causing metal to metal friction between it and the coupler. Then the drive gear seizes, shearing the teeth off the distributor mainshaft. Our Dura-Last gear assembly eliminates this problem because we put needle bearings between the gear and coupler. The bearings won't wear out and stay lubricated for a lifetime. Installation of the assembly takes about 5 minutes with regular hand tools.

## 1963-67 Power+Plus Intake Manifold

- Dual Plane 180° Design Provides Outstanding Power From Idle To 5500 rpm

- For 327 Or 350 Engines • Fully Show Polished

The Power+Plus Manifold is a replacement for the stock manifold on 1963-67 Corvette. Use a Quadra-Jet carb or a 500 to 650 cfm vacuum secondary carburetor. Kit includes adapter plate to permit use of popular square bore carburetors. Power+Plus manifolds are cast from steel molds, not from sand molds. Permanent molds provide a tighter grain casting thereby reducing the occurrence of porosity which can mar the polished finish. Additionally, each Power+Plus manifold is 100% pressure tested for leaks to eliminate any installation problems. This manifold accepts late model choke, waterneck, AC, alternator, and HEI. Has no provision to add oil filler tube. For 1963-68 327 engines, 1969 or later valve covers must be used.

## 1963-67 Edelbrock "Performer" Intake Manifold

- Improves Off-Idle Response, Dramatic Increase In Torque

The Edelbrock "Performer" is an ideal performance replacement for Corvettes with stock small blocks with performance cams and/or headers. The "Performer" dramatically improves off idle response and low end torque and extends all the way to 5,500 RPM. The QuadraJet carburetor bolts directly to the "Performer" utilizing all stock brackets, fittings and cables. Rejetting of the carburetor or other modifications are not required. Gasket is not included.

## 1963-67 Edelbrock "Performer EPS" Intake Manifold Without EGR Valve

- Improves Off-Idle Response
- Dramatic Increase In Torque
- Dual Plane
- EnduraShine Finish

The Edelbrock "Performer EPS" is an ideal performance replacement for stock Corvettes or for small blocks that have performance cams and/or headers. The "Performer EPS" dramatically improves off-idle response & low end torque and the power extends all the way up to 5,500 RPM. The Holley carburetor bolts directly to the "Performer EPS" utilizing all stock brackets, fittings & cables. Rejetting of the carburetor or other modifications are not required and the manifold fits under all stock hoods. For 1963-67 327 engines, 1969 & later valve covers must be used. In addition to performance, this manifold provides the show-quality EnduraShine finish that won't oxidize, fade or turn blue and as an added bonus it cleans easily.

## Holley Performance Carburetor

### • Performance Option For "Performer" Intake Manifold

The Holley 600 CFM performance carburetor is a universal fit carburetor for non-EGR equipped Corvettes.

It features vacuum secondaries, single inlet fuel bowls with side-pivot floats, adjustable needle and seat, electric choke, PCV and distributor vacuum connections. Not legal for sale or use on pollution controlled vehicles.

A5762

397.99 ea.

## 600 CFM Performance Carburetors

### • Great Combo With "Performer" Intake

Our 600 CFM

Carburetors outperform the stock QuadraJet and provide better mileage. These carburetors work with or without an EGR valve and accept the Corvette stock throttle linkage and transmission kickdown mechanism. In addition, they have a universal 12 volt electric choke, vacuum/weight operated secondaries, vacuum advance connection, and PCV fitting. These carburetors have a single fuel inlet which requires a new fuel feed line, but the fuel filter and carburetor gasket are included. Use on an Edelbrock manifold requires the purchase of the carburetor base plate listed below. Used for small block application only. Note: When ordering, please remember that these Carburetors will not fit a stock QuadraJet manifold and some early small bore 63-64 manifolds.

## POR-15® Gas Tank Repair Kit

- Ideal For Saving Metal Tanks With Minor Leaks
- Easy To Use

The POR-15® Kit outperforms ordinary kits because it is a complete kit that goes to the root of leaks and bonds to the metal whereas other products simply cover the leak. The kit includes TankClean™ to remove gum, sludge and varnish, MetalReady™ to remove rust and prepare the tank for sealer, U.S. standard Tank Sealer™ to permanently seal the tank and Fuel Preservative and Stabilizer to keep fuel fresh and fuel systems trouble-free. The tank must be removed from the car to perform the repair.

## 1965-67 K&N Hi-Performance Air Filters

- Increases Air Flow Up To 57%
- Improve Horsepower
- Washable, Reusable Filter

There are 3 good reasons to switch to a K&N Hi-Performance replacement air filter. 1) it increases air flow, improving power and mileage; 2) it operates at a higher level of efficiency for a longer period of time than stock filters; and 3) it's a washable, reusable filter that will be good for the life of your engine. Sealing grease is highly recommended on all filters. AC filter numbers are listed in parenthesis after the year of car.

ACDelco filters take into consideration all elements of the system so you get not only proper filtration, but the correct air or fluid flow for the period of time specified in your service manual. Using ACDelco filters assures that such key performance parameters as the air/fuel ratio will be kept in perfect balance for optimum performance.

## 1963-67 Competition Cams' High Energy Cams, Lifters & Springs

As the one component in your engine that has the greatest effect on power, torque and mileage, Competition Cams' has designed 2 unique camshafts. They have the 260 & 268 series for 63-67 small block Corvettes. Each camshaft, lifters, and springs are described below.

**260 High Energy Cam (Small Block):** This cam is perfect for Corvette owners who want more power without affecting driveability. The 260 is very responsive and is an ideal replacement cam in base engines. The 260 produces up to 10 horsepower over the stock engine and is used on Corvettes with a 3.08 or greater rear axle ratio. Specifications are .446" lift intake and exhaust, 260 degrees duration at .006" lift, 212 degrees duration at .050" lift with 110 degree lobe centers.

**268 High Energy Cam (Small Block):** This cam is for the high performance enthusiast. The 268 produces up to 15 horsepower over the stock engine. This cam has a slight lobe at idle but does not affect power accessories. The 268 will idle down to 600 RPM and still pull strong past 6,000 RPM. The 268 is an ideal replacement in performance engines. Specifications are .460" lift intake and exhaust, 268 degrees duration at .006" lift, 218 degrees duration at .050" lift with 110 degree lobe centers.

**High Energy Lifters:** When installing a new cam, installation of new lifters is a must! Use of old lifters voids the cam warranty.

**High Energy Valve Springs:** When installing a 260 small block cam, use stock valve springs if they still maintain their like-new pressures. In cases where the stock springs have lost their tension or for all other cam installations, use Competition Cams' High Energy Valve Springs.

*Note: Check your state and local laws on emission standards.*

## 1963-67 Competition Cams' Magnum Roller Tip Rocker Arms

- Dyno Proven 20 Horsepower Gains
- Reduce Valve Stem & Guide Wear

Competition Cams' unique forge-cast roller tip design reduces friction. As a result it has been dyno tested to produce 15-20 horsepower increases and it makes valve stems and guides last longer. Magnum Rockers fit all 63-67 small block engines (1.52 rocker ratio) and all 65-67 big block engines (1.70 ratio). Each rocker is supplied with a rocker ball and lock nut. Set of 16.

## 1965-67 Finned Aluminum Big Block Valve Covers Without Power Brake

- Strong Sand-Cast Aluminum Construction
- 3/8" Taller For Rocker Arm Clearance
- Classic Appearance With Raised Corvette Script & Fins
- Thick Machined Gasket Flange For Secure Fit
- Clean Inside For Maximum Clearance
- Made In U.S.A.

These PML valve covers feature raised CHEVROLET script and fins. They are taller than stock and fit Chevy™ big block engines. The valve covers have PCV and oil fill/breather holes and baffles cast into the covers to prevent oil leaks. These covers are 3/8" taller than our standard height covers to fit over most roller rockers, such as Jesel. The covers use stock grommets and gaskets (not included).

- Unique Gasket Material Swells To Control Leaks

Ultra-Seal™ material provides a positive seal through controlled swelling of the gasket once exposed to hot engine oil. The polymers used in Ultra-20™ also insure gaskets will not harden and fall apart like others can. Gaskets are coated with an easy release material which helps prevent tearing when the valve covers are removed.

## 1963-67 Dual Electric Fan System

The Flex-A-Lite Dual Electric Fan System is the most powerful system on the market today. It pulls 2200 CFM and totally eliminates the need for the stock fan and shroud. The dual 12" fans fit compactly in a shroud area and measures only 2-1/4" in depth, 27" across and 15-1/2" high. With these measurements, it will fit almost all Corvettes (please measure your radiator core before ordering) and can be mounted either on the radiator core support with supplied brackets or through the radiator using mounting straps. This system allows you the flexibility of operating both fans thermostatically or one on continuous run and one thermostatically. All mounting hardware and instructions are supplied.

## 1964-67 Chambered Exhaust Kits

- Replaces Original Under Car Exhaust System
- Sounds Like Original Side Pipes
- Easy Bolt-On Installation • Limited Lifetime Warranty

One of the sweetest sounds ever produced was heard on Corvettes with factory equipped, chambered side exhaust. Now you can enjoy the perfect exhaust note without the expense of the side pipe covers. These dual exhaust kits bolt on to the stock manifolds and route just like the stock manifolds and route just like the stock system. No modifications to the car are required. Kits include stainless steel exhaust tips. Not only will you get great sound, you'll also get improved performance plus a limited lifetime warranty on the chambered muffler. And unlike other less expensive kits, our kit features heavy-duty, 14 gauge pipes. All necessary installation hardware is included. Available in aluminized or stainless steel. Specify manual or automatic transmission.

## 1963-67 Dynomax Super Turbo Mufflers

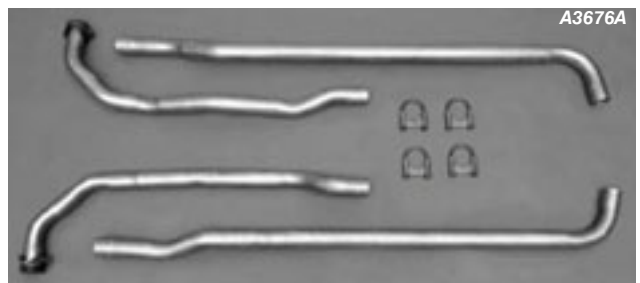

- Quiet Like A Muffler
- Straightpipe Performance

The DynoMax Super Turbo Muffler produces more horsepower and torque in all driving ranges and operating conditions. Its oversized flow tubes and patented flow directors reduce exhaust turbulence, and eliminates back pressure for improved exhaust flow and maximum power.

## 1963-67 Exhaust Pipes

- Stock Replacement Systems Aluminized Or Stainless

Replace your Corvette's rusted-out exhaust system with our aluminized coated steel or stainless steel exhaust pipes. The aluminized coated steel pipes will last 3 times longer than the stock exhaust system and our stainless steel pipes are backed by a manufacturer's limited lifetime warranty. We have direct replacement exhaust pipe systems and mufflers. Our direct replacement systems are bent to factory specifications and all 1963-67 systems are available in either aluminized or stainless steel. The aluminized components are made of carbon steel and coated inside and out for long life. The 2" stainless steel components are made from 409 stainless. All components are supplied with installation hardware including all necessary pipes, clamps, flanges, donut gaskets and donut gasket inserts. Does not include hangers.

29410

Hooker sidemounts are available for small block and big block applications. Both models feature the four-in-one styling and culminate into a 4" collector. The small block headers have 1-7/8" primary pipes while the big blocks boast 2-1/8" primaries. Hooker sidemounts fit any combination of air conditioning, power brakes or steering, and manual or automatic transmissions. Each header set comes with gaskets, bolts, mufflers and instructions. Not legal for sale or use in California. Please check state laws before installing. For 63-67 Corvettes, order #26752 and #41064 alternator bracket's and #26753 air conditioning bracket if so equipped.

### 1963-67 Ram Premium Clutch Kits

- Upgrade Over Original Equipment
- Pressure Plate, Disc & Throwout Bearing

This Kit features a matched pressure plate, clutch disc and throwout bearing set that has been designed for engines that have been mechanically upgraded over stock. This is a direct replacement for stock assemblies and requires no additional effort in driving. The additional torque capacity of this clutch is the result of a much improved clutch disc friction material that can withstand the added power output and aggressive driving style of today's mildly modified street combinations. Each set includes a pilot tool to make alignment of the disc a snap.

### 1963-67 Centerforce Clutch Systems

- Reduces Pedal Pressure
- Greater Holding Capacity

The Dual Friction System Set includes the clutch plate and disc, and generates up to 90% more holding capacity over stock systems. Designed for use in engines producing high horsepower and torque output. The Centerforce System, comprised of a clutch plate and disc (purchased separately) generates up to 60% greater holding capacity over stock systems and is designed for mildly modified vehicles used for street and strip driving.

## 1963-67 Fidanza Manual Transmission Aluminum Flywheels

- Ideal For Unleashing Your Engine's Full Power (Approximately 25 Horsepower)
- Upgrade Over Stock Flywheel Offering Superior, Replaceable Friction Surface
- Perfect For Spirited Driving Because Flywheel Decelerates Quicker When Disengaged Allowing You To Match Revs Sooner

For years and years savvy tuners and racers have used aluminum flywheels for improved performance. Fidanza's hi-performance 10-13.5 lb. flywheels will give you an instantaneous improvement in performance and is an instant upgrade over your stock flywheel. Fidanza's 6061 T6 billet aluminum flywheels are SFI approved, have a completely replaceable 1050 high carbon alloy steel friction surface and a steel ring gear.

Footnote: Lightweight flywheels are an excellent way to distribute the horsepower that an engine creates more efficiently. Aluminum flywheels will without a doubt add much more performance to your engine. Because factory built flywheels are so heavy it takes an immense amount of power just to get it rotating. To rotate the factory flywheel from 1000 rpm to 6000 rpm can take as much as 40 horsepower. That same application with an aluminum flywheel, because of its lighter weight, takes less than 15 horsepower. This means that the horsepower the engine is saving is actually sent to the wheels and not spent rotating the heavy steel flywheel. To establish this as fact and not theory, Fidanza has tested this time and time again. The results have shown that for both drag and road racing a lightweight aluminum flywheel has dominated the tracks and streets. If you're wondering about the drawbacks, there are none. With all the benefits of the lightweight flywheel, driveability is virtually unchanged and in most cases improved. Whether the car is your daily driver or a pure race machine, Fidanza flywheels are a great choice.

## 1963-67 Differential Remanufactured Side Yokes

- Eliminate Unnecessary Repair Expenses
- Lifetime Warranty Against Wear Or Failure

The stock side yoke ends wear down depositing damaging metal into the rear end. Worn yokes cause rear wheel camber problems which causes tire wear. Our retrofitted side yokes are made from original GM yokes. Once reconditioned, precision machined 0-1 tool steel button inserts are installed in the ends. The button insert itself is hardened and press fit into the yoke. Core charge added.

- Professionally Rebuilt
- Gears Set To Factory Specs
- 1 Year Unlimited Mileage Warranty

Each unit is equipped with new Timkin bearings, races and seals. In addition, you receive a new positraction clutch pack. As specified below the differentials are rebuilt with all new gear sets. A \$450 core deposit will be added to the price of the differential. The core deposit will be refunded upon receipt and inspection of a rebuildable core. A deduction on the core will apply for cracked cases, egg-shaped pinion shaft holes, broken ring gear bolts and broken gears. Please specify front yoke diameter (3.75" or 4.25 OL).

Note: Cores must be returned within three weeks of invoice date in order to qualify for any refund. Sorry, no exceptions.

## 1963-67 Complete Front Monospring System

This kit makes your 1963-67 Corvette ride and handle like a 1996. How? It replaces the conventional front coil springs with a composite mono leaf spring, allowing you to realize the technological advances of the transverse design that comes stock on the 1984-96 Corvettes. You'll feel an amazing improvement in both ride comfort and handling! The kit installs in approximately 5 hours and requires no modifications or welding. Included are pre-assembled, powder coated control arms, with smooth riding polyurethane bushings, new heavy duty ball joints, composite spring and hardware. In addition, this kit offers ride height adjustment and adjustable spring rate. With its lighter weight construction, unsprung weight is reduced, allowing the suspension to react quicker to the road. This package comes with a 5 year warranty.

### 1963-67 Advanced Street & Slalom Suspension System

- Ideal For Serious Street Performance & Occasional Autocrossing

- A Marked Improvement Over Factory F-41 Performance Suspension

This system, using the composite rear monospring rated at 330 Lbs. or 340 Lbs. will provide not only a better ride but much better reaction than the stock steel spring. The 550 lb./in. front powder coated coil springs are a big step above stock springs. When you combine this with the modern technology of Bilstein Sport Gas Shocks, beefier sway bars and polyurethane suspension bushings you get a complete suspension makeover at a very economical price. This kit cannot be shipped by air.

Kit includes:

- Front Coil Springs & Sport Rear Composite Monospring With Mounting Hardware
- Front & Rear Bilstein Sport Gas Shocks
- Polyurethane Shock Mount Grommets
- Addco 1.125" Front & .750" Rear Sway Bars
- Polyurethane, Adjustable Smart Struts

## 1963-67 Stage II Sway Bar Handling Kit

- Sway Bar Upgrade Reduces Body Roll
- Provides Improved Cornering With Larger Sway Bars
- Prolongs Tire Wear Via Better Tire Contact
- Improves Driver Confidence With A More Predictable Handling Corvette

Eckler's Stage II Handling Kit up-sizes the factory sway bars to 1-1/8" in the front and 7/8" in the rear for a marked improvement in handling. Bigger bars deliver a more predictable, flatter handling, more responsive Corvette. With reduced body roll, the change felt by the driver is immediate, with instantaneous response to steering commands and an improved feel to the driver on the car's handling. Included in this kit are new polyurethane mounting bushings and end links which complement the sway bars reaction and they last forever. Tire wear is improved by maintaining a flatter tire contact patch to the pavement eliminating unwanted shoulder wear. Installation is accomplished with average mechanical ability and basic hand tools.

## 1963-67 Smart Struts And Performance Camber Rod Kit

- Increases Rear Wheel Traction
- Reduces Uneven Tire Wear

Give your Corvette's rear suspension, the competitive edge. Smart Struts increased adjustability and rigidity improves suspension geometry, eliminating camber change during suspension travel. This keeps more of the tire's contact patch on the ground at all times. The result is improved traction and stability during hard cornering, as well as more off the line traction. Its heavy duty construction will also maintain alignment settings better than the factory components under aggressive driving maneuvers. Kit comes complete with: heavy duty upper strut rod mounting bracket, custom poly-adjustable struts, all hardware and instructions

## 1963-67 Heavy Duty Trailing Arms

- Available In Standard and 2" Off-set

Off-set arms can accept 2" over the standard tire size and still give you the same recommended factory alignment. This added off-set dimension allows the weight to be centered so you get less wear and tear on the wheel bearings. Both trailing arms are treated with rust prohibiting primer and epoxy paint and are supplied with polyurethane bushings. The product is built with 1/4" C channel to eliminate water build up in your trailing arms.

## 1963-67 Stainless Steel Trailing Arm Alignment Kit

Our Stainless Steel Trailing Arm Alignment Kit is a direct replacement for GM parts. Unlike GM adjustment shims these parts won't rust, making rear end alignment much, much easier. This kit costs less than the price of buying the shims separately and includes (enough for both arms): 24 stainless steel alignment shims (in 4 sizes), grade 5 pivot bolts, cotter pins, castle nuts and 4-1/2"

long stainless steel cotter pins. Instructions included.

## Bearing Packer Tool

- Use To Pack Ball & Roller Type Wheel Bearings
- Requires Use Of Grease Gun

Our universal bearing packer quickly and easily packs any bearing with new grease. You simply place the bearing between cones, tighten and apply grease thru the fitting. Old grease is forced out while new grease is evenly injected into the bearing. A grease gun is needed to use this tool.

## 1963-67 Steering Box Rebuild Kits

- Great For Do-It-Yourselfers
- Allows You To Keep Original Casting
- Provides "Quick Design" 16:1 Ratio For Improved Response
- Unlike Other Kits This One Doesn't Make You Recycle Old Components

For the Corvette enthusiast who would prefer to keep the original GM casting, we offer a parts kit to rebuild your own box. Most rebuild boxes on the market only have new bearings, races and seals installed. The worm and nut and sector, which are the critical parts that are needed for that new steering response, are not available NEW so the old parts are recycled into rebuilt boxes. This kit enables you to remanufacture your own steering box with ALL NEW components including: Worm and Nut 16:1 Ratio Sector Shaft, Bushing Kit and Bearing & Seal Kit. Note: Remanufacturing your own steering box requires some technical expertise and some machining may be necessary (i.e. bushings).

- 30 Year Leap Forward In Steering Technology

The Steeroids system completely replaces the original steering system with an up-to-date rack and pinion. The difference between even a brand new stock C2 and a rack and pinion system is remarkable. And best of all the conversion is completely bolt-on and requires no permanent modification to your Corvette. The kit includes a remanufactured GM rack and pinion, all necessary mounting hardware, fasteners, adapters and hoses. The only item not included is the power steering pump which we assume you have. All steel components in the kit are black powder coated and the aluminum components are anodized.

## Dual Chamber Brake Master Cylinder Pressure Bleeder

- Bleeds Brakes Like The Professionals
- Pressurized Brake Fluid Forces Trapped Air From Brake System
- Fits All Dual Chamber Automobile Metal Master Cylinders

Finally an affordable and easy-to-use brake pressure bleeder for the do-it-yourself mechanic is now available. This tool uses air pressure to force brake fluid through the system during the brake bleeding process. Pressurized fluid forces all the trapped air in the hydraulic system out, providing the most efficient way to have a firm brake pedal. This kit will work on any dual chamber, metal master cylinder and eliminates the need for a second person during the bleeding process.

## 1963-66 Direct-Bolt Knock-Offs And 1967 Bolt-On Wheels

- Original Styling In A Bolt-On Design
- Four Styles To Choose From

1963-66 Corvette owners can now have the performance and safety of bolt-on wheels yet retain factory knock-off style appearance. Eckler's has three original styles to choose from: the 1963-64 style with "raw cast" finish; 1965 style with black painted recesses and polished chrome cones; or the 1966 style with black painted recesses and brushed chrome cones.

Additionally, the cone and spinner are kept in place with a special anti-theft lock pin.

Unlike the original style, each wheel is held in place with five lug nuts and indistinguishable from original style knock-offs.

*1963-66 sets include wheels, adapters, spinners, cones, stainless steel center caps, anti-theft pins, lug nuts and instructions.*

## 1963-66 Original Style Knock-Off Wheels

Same appearance and description of direct bolt wheels shown except these are true knock-offs for the purists who want total originality. Sets include wheels, adapters, spinners, stainless steel cones, center caps, anti-theft pins, lug nuts, lead hammer and instructions.

## Eckler's Fiberglass Repair Materials

Eckler's Repair Materials will work on all fiberglass types used on 1963-67 Corvettes. **These repair materials are not formulated to work on 1973 and later Corvettes with SMC body panels.**

**Shelf Life Note:** Eckler's repair materials, except for spray gelcoat, have an approximate shelf life of six months, depending upon usage and storage conditions. Eckler's Spray Gelcoat should be used within 90 days for best results.

## Spray Gelcoat

The only product available that will permanently seal errant fiberglass strands. Spray gelcoat's unmatched sealing qualities also prevents body fillers from bleeding through. MEKP hardener included. Usage is approximately two gallons for an entire Corvette.

## Choose What's Right For You...

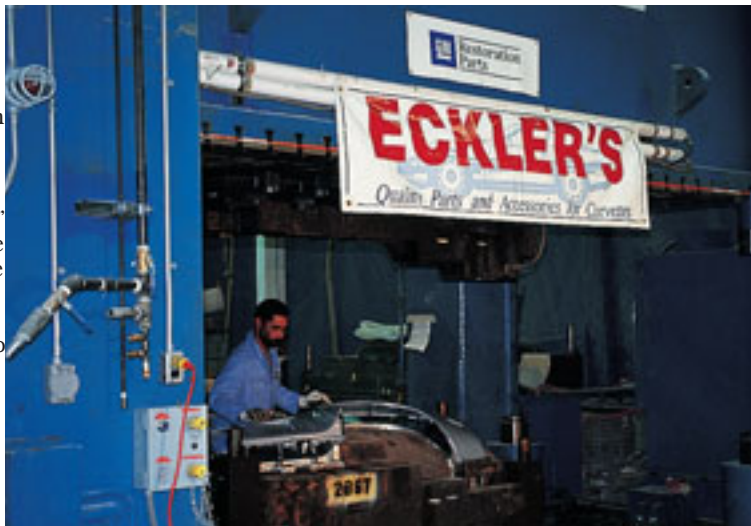

### Hand Laminated or Press Molded Fiberglass Body Parts

#### Hand Laminated

Hand laminating fiberglass is a great manufacturing process for low volume production or when making parts with compound curves. In fact, Eckler's has been using this process since 1965. Eckler's process begins with three mils of gel coat sprayed into a female mold to form the smooth outer surface. Next, resin is painted by hand onto the gel coat, followed by the "laying-in" of three layers of mat and resin. The mat and resin are then carefully rolled out with a hand roller to eliminate air bubbles and to assure uniformity. This very process allowed Eckler's to create unique parts like the one-piece front end, which is stronger and easier to install than the factory multi-piece units. Now, some thirty years later, Eckler's is still manufacturing its parts with the hand lamination process. This time honored system, combined with Eckler's use of only automotive grade resins and gel coat produces a beautifully smooth, strong, and easy sanding part. In addition, hand laminated parts from Eckler's are a less costly alternative than equivalent press molded products. The only feature hand laminating does not provide is a smooth inside finish. And, it's this look that is prized by purists to keep their Corvettes perfectly original looking. In a nut shell, that's the story of hand laminated fiberglass.

#### Press Molded

Press molding is also a simple method of manufacturing, but costly from a tooling standpoint. Press molded parts are made with a huge hydraulic press which holds large male and female steel tools (molds). Fiberglass mat and resin is placed between the tools and pressed together under extreme high pressure and heat. This process is ideal for manufacturing high volumes of parts with a perfectly uniform thickness that are smooth on both sides (just like the original). However,

press molded parts do not have a gelcoat finish nor does it allow the production of large parts requiring compound curves. Thus the need for bonding strips. An alternate means of producing fiberglass with the same appearance of press molded, is low pressure molding. With this method, fiberglass mat is precisely cut and placed inside a two-piece closed mold. Resin is injected into the mold and once cured, produces a part smooth on both sides. Both the press molded and low pressure molding process offer the restorer a quality, original appearing fiberglass part.

#### The Final Choice

Of course the final choice is yours, what's important to you and you alone, originality, cost, ease of installation. It's your call and it'll be right if you choose Eckler's!

### Hand Laminated Fiberglass or Injected Molded Urethane Bumpers

#### Flex-Fit Fiberglass From Eckler's

Eckler's also manufactures its hand laminated bumpers with a specially formulated flexible resin. This new material creates a bumper with the flexible feel of urethane while maintaining all of the good fit and finish qualities of Eckler's original fiberglass parts.

#### Hand Laminated Fiberglass

As described above, hand laminating fiberglass is a simple, effective way to produce small quantities without the expense of costly steel tooling. Since 1974 Eckler's has been hand laminating distortion-free bumpers. Bumpers that look immaculate on Corvettes that are flawlessly prepped on the outside. The only feature fiberglass lacks is the inability to sustain a minor crash impact without cracking. Yet, for all of its good qualities the hand laminated part is still distinguishable from the urethane because it does not have a smooth inner surface nor does it have the flexible feel to the touch of the Flex-Fit and urethane bumpers.

#### Injection Molded Urethane

In 1973 GM made its first urethane front bumper for Corvettes. The technical name for the process of building ure-

thane bumpers was called reaction injection molding or R.I.M. for short. The process requires injecting urethane into a closed steel tool. The urethane reacts to the heat applied to the mold, cures and a flexible part is produced. A flexible part was required by the Federal Government in 1973 so that a car/Corvette could sustain a 5 mph crash without damage. Unfortunately, the urethane materials originally utilized thru 1982, produced a part that often became wavy producing a highly unattractive look. In addition, the original material gave painters fits because they could rarely get a good paint match between fiberglass and urethane.

Today, Eckler's builds its GM Restoration Parts Bumpers from the original General Motors Tooling, using new enhanced urethanes, virtually eliminating problems of the past. The process (R.I.M.) is the same but the bumpers remain distortion-free, yet they retain the original flex capabilities.

And best of all, paint matching is no longer a problem. For the purists, it's the real McCoy and indistinguishable from the original!

#### The Final Choice

The final choice is of course a toss-up. It's your call - 100% originality or the lure of a great part at a better price.

Front Back

Those demanding absolute authenticity in their restoration parts will find nothing better than Eckler's press molded, resin dyed fiberglass parts. Manufactured to the most stringent tolerances, these parts are indistinguishable from factory parts in color, configuration, uniformity and fit.

Note: While the majority of the Corvettes produced in 1963 and 1964 were white pigmented fiberglass and 1965 and 1966 were gray, some 1964 models were gray and some 1965 models were white. On special order, all 1964 parts are also available in gray and all 1965 in white pigmented fiberglass.

## 1963-67 Jig-Fit Assembled Front Ends

- Precisely Assembled In A Fixture -- Ready To Install
- Original Factory Adhesive Color And Texture
- Includes Factory Style Headlamp End Plates And Header Bar Reinforcement

Completely assembled front ends include inner skirts. A bonding strip is installed along top of inner skirt on 1963 models and an upper seal is used on 1964-67. Header bar is assembled with original style rivets to a bonding strip prior to bonding into front end. Price includes crating charge. Allow five weeks for assembly.

## Battery Tender

- Safe, Reliable, Trouble Free Battery Care
- Developed To Maintain Batteries Not In Constant Use Or Storage

Automatically switches off after fully charging to storage charge constantly monitors the battery without the damaging effects of trickle charging. The initial charge cycle of the Battery Tender brings a battery to a full charge at approximately 14.4 volts about 1.25 amps. After a full charge is reached, the Battery Tender automatically converts to a float charger and monitors the battery at 13.6 volts. Although there is a constant voltage of 13.6 volts being applied to the battery, it is doing so at very little or no current. What this means to the user is safe, reliable, trouble free battery care. Equipped with 6' power cord, and 6' output cord with clamps, 5 year warranty.

## Battery Tender Waterproof 800 Charger

- Charges Battery & Maintains Proper Storage Voltage Without Damaging Effects Caused By Trickle Chargers

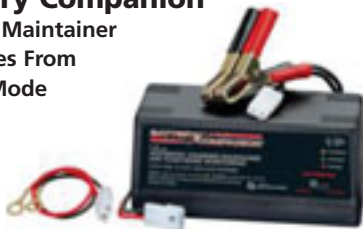

The Battery Tender Waterproof 800 is perfect for outdoor use. Its circuitry is totally epoxy encapsulated so it will perform even while submersed under water. The unit packs 800 milliamps of pure charging power yet it is no larger than the size of a standard computer mouse. You can use Battery Tender anywhere in the world (100-240VAC 50/60 Hz) and the unit is reverse polarity protected, spark proof and it complies to international safety standards (UL/CSA/CE). Like all Battery Tenders, it has a microprocessor (brain) that controls the charging of each battery so that your battery doesn't get "cooked" the way conventional chargers can do. This lightweight unit weighs only 1 lb. and carries a manufacturers' 2 year warranty.

### The Complete Book Of Corvette

Here's a book all Corvette enthusiasts need on their coffee table. Author Mike Mueller reviews everything Corvette since its introduction 50+ years ago. Illustrated with 400 color and 100 black & white photos, this book shows every model from the 6-cylinder in 1953 to the C6 of today. Besides the production Corvettes, this hardcover 10-1/2" x 12" book offers an in-depth look at prototypes and experimental models, anniversary and pace cars plus specialty packages for street and competition driving that made the Corvette an automotive legend. This book is the ultimate resource on America's favorite sports car.

## 1965-67 High Performance Brake Rotors

**NEW**

- Cryo-Slotted/Drilled
- Bolt-On Installation

Cryogenic tempering is a one-time stress relief process that involves both cold and heat treatment of the brake rotor. This stress-relief process permanently improves the performance and service life of all metals. Cryo-treatment delays the formation of heat checks on the braking surface and gives the rotor an extra level of protection against warping.

## 1963-67 Non-Power Steering Rack & Pinion Conversion Kit

- Easily Converts Your Corvette To Rack & Pinion Steering
- Complete Instructions Included
- Requires Drilling Holes In Motor Mount Brace

Convert your non-power steering Corvette to modern steering technology. The rack & pinion system is far superior to the old Corvette's leaky steering valve and piston system. Drilling a hole in the motor mount support is required, but everything else is bolt-on using existing holes. More precise steering without leaking fluid is the way to go.

### Eckler's Gift Certificates

Let them make their  
ownchoice with an Eckler's  
gift certificate available in any denomination.

### Limited Warranty

Eckler's will not be responsible for any damage  
or loss caused by delays, failures or other con-  
sequential damage, nor for labor, transportation  
or any other charges incurred in the replace-  
ment or repair of a defective item. Eckler's  
accepts no responsibility for any consequences  
resulting from installation of any parts.

### Returns

To be eligible for return, the product must be  
in like-new condition, in original packaging and  
accompanied by a copy of the invoice. Special  
order parts are non-returnable.

Product must be received within 30 days of the  
date of the invoice to be eligible for a full  
refund. Products received within 31 to 60 days  
are subject to a 25% restocking charge. No  
returns allowed beyond 60 days of invoice date.  
All returns must be sent prepaid. It is suggest-  
ed to insure the returned item for its full value  
to protect against loss. Allow up to 3 weeks  
from the date of shipment for processing  
refunds, credits and exchanges.

### Package Protection Plan Rates

Eckler's allows total peace of mind by eliminat-  
ing any hassle or risk in the event of loss or  
damage of parts during shipment. If a problem  
arises, call our Customer Service  
representatives for a quick resolution.
