On all models except convertibles - if the front door crowds at top and is widely spaced at bottom near the center pillar. To correct this add shims at point "A" or reduce shims at point "B".

There are many times when simple door adjustments will not give a satisfactory door fit. In this case, body shims added or taken away at specific body mounts will solve the problem. The Tech Book P/N 17-150 (see Manuals & Literature section) includes a complete article that outlines where to add or take away shims to correct specific door fit problems by body style.

## 1955-57 Complete Power Front Disc Brake Kit

- Includes All Components To Convert To Power Front Disc Brakes
- Large Vented 11" Rotors
- Kit Includes Prebent Lines
- Installs With Simple Hand Tools

Are you ready for a huge improvement over original, unpredictable four-wheel drum brakes? If you are, then our complete power disc kit is for you. Our comprehensive kit includes: Large 11" vented rotors, single piston calipers,

caliper brackets, pads, hoses, lines, 8" dual diaphragm power booster, dual master cylinder, proportioning valve and bracket, bearings and all hardware needed to install. Spaces the wheels out 7/8" closer to fender on each side. Just bolt-on with our easy-to-follow instructions, add fluid and go. Owners of 1957's with original 14" steel wheels will need to use an aftermarket wheel or P/N 10-300 wheel in order to clear the disc brake calipers.

## 1955-57 Dual Master Cylinders

- Improved Safety Over Single Master Cylinders
  - Brand New, Not Rebuilt
- Original 1955-57's came with a small, single master cylinder. If that cylinder fails, all the brakes on the car fail as well. Installation of a dual master cylinder improves braking and safety dramatically. Requires use of proportioning valve and new brake lines.

## 1955-57 Dakota Digital Dash Kits

- All LED Readouts
- Several Colors Available
- Fits Stock Dash Bezel

Bring your early Chevy into the new millennium with these vacuum fluorescent digital dash kits from Dakota Digital. These kits include a digital speedometer, bar and digital readout tachometer, oil pressure readout, water temperature readout, fuel, temperature and voltmeter readouts, turn signal and high beam indicator. The odometer includes an internal trip odometer. The speedometer is easy to calibrate to any driveline combination. Includes the electronic control box and necessary senders. Easily installed in cars with stock or updated wiring harnesses. Does require some cutting of the stock underdash wiring harness. Fits in your stock dash bezel. For automatic transmission cars, order the optional indicator sender to activate the built-in transmission indicator. (Cluster housing not included).

## How To Order Your Custom Steering Wheel:

- 1. Steering Wheel** - Choose the style of steering wheel you wish to purchase for your classic.
- 2. Horn Button** - Choose your horn button. If you like the exposed installation screw look, choose a "Small" horn button. For a smoother look that completely covers the center of the wheel, choose a Large horn button.
- 3. Leather Half-Wrap** - After choosing your wheel and button, it's time to pick the wrap (unless you are buying a "Solid" wheel). The wrap is firm leather covering that attaches to the wheel on the face side. Wraps come in several colors, so choose one to match or complement your interior colors.
- 4. Adapter** - You're almost done! All that is left is to choose the proper adapter for your steering column. Adapters are available to fit all types of original and aftermarket GM columns.
- 5. The last step:** purchase and enjoy your custom steering wheel package!

--------	---------	------------	--------	------	------------

13-15 Detail

The vertical window weatherstrip included in our kits are molded to the correct size, shape and contour to OEM specs!

13-18 Detail

The J-shape weatherstrip is placed on the forward door jamb near the upper hinge to channel water down into the inside of the door and out the bottom. The EPDM used in our J-shape weatherstrip is low petroleum so the glue will secure the rubber to the door properly.

13-09 Detail

Unlike the original wire retainers, our weatherstrip uses nylon push-in clips which are far easier to install and remove from the holes in the body.

13-104 Detail

Molded ends and corners are vulcanized in place for correct fit and maximum durability.

# Door/Grommets/Bumpers & Plugs

One of the many items that seems to cause confusion among Classic Chevy owners is the location of grommets, bumpers, and plugs. This month's Tech Help article will educate you on this subject! Nearly all of the grommets, bumpers, and plugs are now available for Classics. These items are available either in kit form or sold separately. The following pages contain diagrams showing the locations and part numbers of all of the grommets, bumpers and plugs that we carry.

## 1955-57 Alternators

- Replacement Parts
- Updates Your Charging System
- 70 Amps Output

Original generators very often can't keep up with the addition of electronic accessories so common on today's classics. An alternator will upgrade your system and keep your battery fully charged. Use the internally regulated alternator if you wish to retain the stock indicator light. One-wire alternators will not operate the indicator light.

For Wiring harnesses, see pages 242-250.

## 1957 Front End Seal Location

### #03-26 Air inlet sleeve

Fits joint between forward and rear air duct both sides.

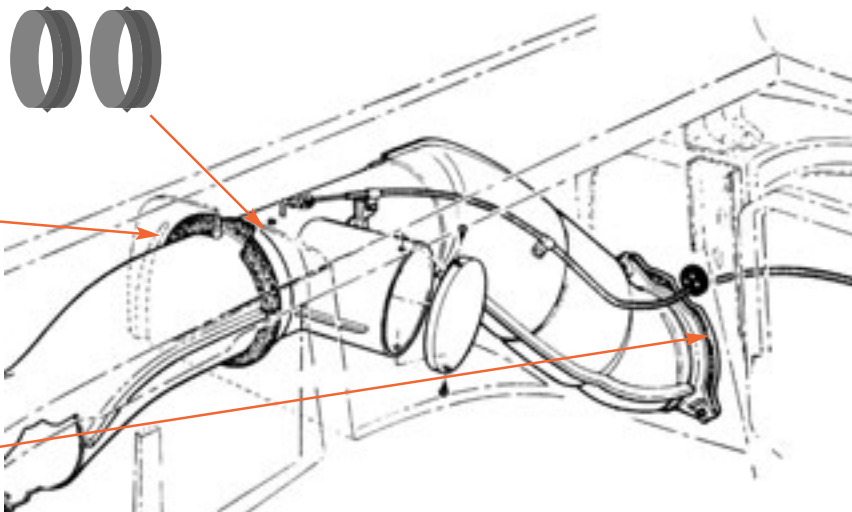

(7F)

### #05-17

Inner fender air duct seal. Fits the hole in the inner fender that forward air duct passes through to prevent squeaking. Installs originally with six staples each side.

### Included in #03-22

Rear air duct to firewall seals, glued to the firewall on both sides.

### #03-21

Air inlet hose to blower motor. The flexible duct between the inner fender duct and the blower motor on deluxe heater cars.

(7G)

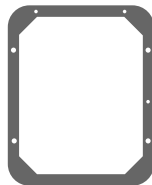

### Included in #03-22

Blower housing to inner fender bracket seal on all deluxe heater cars.

### Included in #03-22

Firewall to firewall plate seal. On deluxe heater cars, it goes between the heater car bracket and firewall. On standard or no-heater cars, it goes between the firewall plate and the firewall.

### #05-30

Blower motor square rubber sleeve. Seals between the blower motor housing and firewall duct on deluxe heater cars.

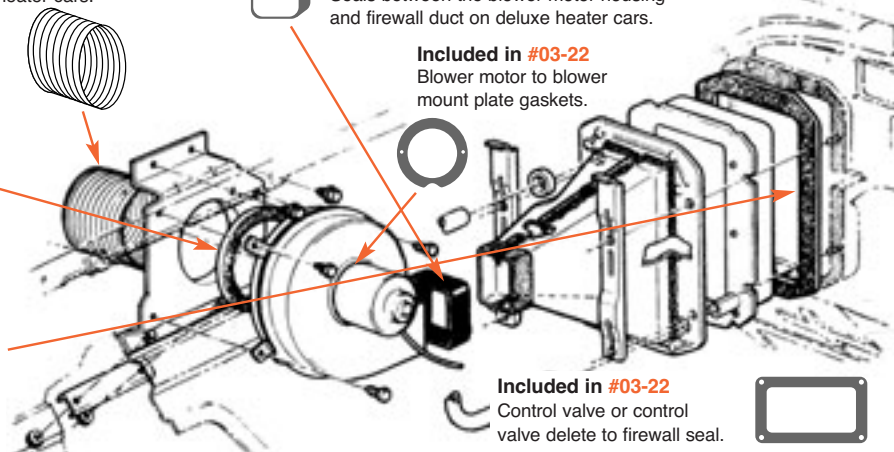

### Included in #03-22

Blower motor to blower mount plate gaskets.

### Included in #03-22

Control valve or control valve delete to firewall seal.

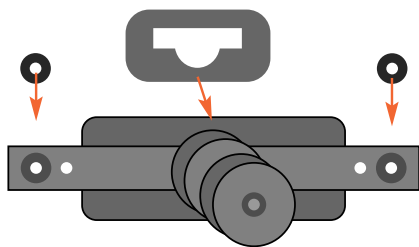

### #05-20 Wiper drive seals

The small circular seals are installed behind the drive on outer attaching holes to seal against the firewall. The large center seal installs wide side down behind the drive to seal between the drive and firewall.

(7H)

Rear view. The center drive is installed wide side down.

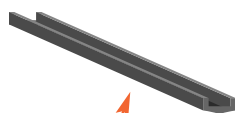

### Hood to cowl seals

#### #13-01 1955

Uses nine push-in clips (included) to attach to the top of the cowl.

#### #13-03 1957

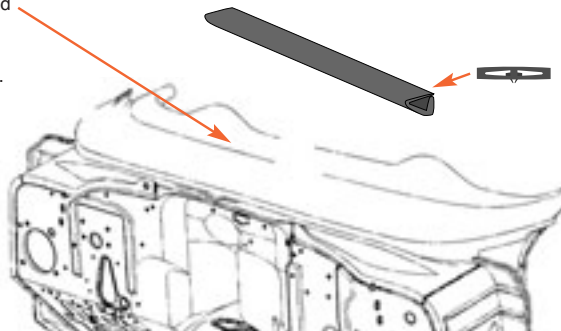

Uses five screw-in retainers (included) to attach to the top of the cowl. The phillips screw and clip traps seal to the top of the cowl at five locations. Trim the ends of the seal once installed.

(7I)

### #13-02 1956

Uses eleven push-in clips (included) to attach to the top of the cowl. Install with the open side to the rear and the wide side down. The clips are installed inside pushed through the rubber into holes in the cowl. The clips are covered by the top flap once installed. Trim the ends of the seal once installed.

### Tech Tip

*Flowmaster or turbo? Both types of mufflers will give you improved performance on the street. For a more mellow exhaust note, choose turbo. For a louder, more commanding tone go with Flowmaster*

## Do Your Headlights Go Off And On?

Stock headlight switches are rated up to 15 amps. Halogen headlights draw up to 18 amps while Xenon and HID lights can draw even more. The higher amperage draw of updated headlights will often cause the breaker points on an original or reproduction headlight switch to open. This is a built-in safety provision to prevent the headlight switch from overheating and burning up. Unfortunately, this safety provision will also cause your headlights to go out! A bit scary if you are driving at night. Our P/N 22-268 headlight relay and wiring kit will solve the problem.

## 07-220 Complete Reproduction 1957 Bel Air 2-Door Hardtop Interior Package

This complete, correct, reproduction interior package for your '57 Bel Air hardtop is available in all seven original trim codes.

### Included:

**Pre-sewn Front and Rear Seat Covers** - Made from correct heavyweight vinyls and cloud pattern cloth with vinyl beading at all seams. Original style cloth listings are attached for easy installation. These listings accept the original listing wires that should be removed from your original covers. Eight new silver seat buttons are also included for the backrest inserts. Seat side shell vinyl is also included to cover your original front seat side shells. New seat foam 07-100 front and 07-113 rear is recommended for proper seat firmness and cover fit.

**Pre-Assembled Door & Quarter Side Panels** - New heavy card stock panels complete with all new metal edge nail bands covered with vinyl and cloud cloth material. Door and window handle holes are pre-punched in the cardboard but not through the material in case power windows are alternate lift systems are used. The 4-piece vinyl windlace to complete the door openings are also included. A pair of new correctly colored kick panels are also included with the side panel kit. New vinyl rear armrest covers are also included to install on your original metal rear bases. The side panel cardboard is pre-punched for the side panel stainless trim which should be reused from your original panels. If yours is missing or damaged, full sets are available as P/N 07-72.

**Carpet** - Correct nylon loop weave carpet in the original color with proper heel pad and vinyl edge binding. Also includes jute underlay already glued to the back of carpet and dimmer switch grommet. Carpet is pre-cut and molded yet is generously cut at the door/sill plate area so you have ample material to trim down to fit your car properly.

**Headliner** - Pre-sewn pyramid pattern vinyl with cloth listings to accept original wire supports.

**Sunvisors** - No need to try and recover your originals as these are already sewn onto new boards and rods with new binding and chrome end trims to match your new headliner. Install using your original chrome brackets or replace with P/N 02-35.

## 1955-1957 VIN Numbers (Vehicle Identification Number)

### Vehicle Identification Numbers

This stainless steel plate is spot welded to the driver's side "A" pillar post. It is 7/8" wide and 3-1/4" long. It contains four valuable pieces of information.

#### A.

One or two letters are stamped. If there are two, the first letter will always be a V. V designates a car equipped with a V8 engine. The other letter identifies the series of the car (Bel Air, 210, 150).

#### 6-Cylinder

#### V8

A - 1500 (150 except Delivery) VA - 1500 (150 except Delivery)  
 B - 2100 (210) VB - 2100 (210)  
 C - 2400 (Bel Air) VC - 2400 (Bel Air)  
 D - 1508 (Sedan Delivery) VD - 1508 (Sedan Delivery)

#### B.

Two numbers are stamped. These numbers designate the year of the car.

55 - 1955

56 - 1956

57 - 1957

#### C.

A single letter is stamped. This letter designates the Chevrolet assembly plant where the car was built. This plant may differ from the Fisher plant listed on the cowl tag.

A - Atlanta, GA

B - Baltimore, MD

F - Flint, MI

J - Janesville, WI

K - Kansas City, MO

L - Los Angeles, CA

N - Norwood, OH

O - Oakland, CA

S - St. Louis, MO

T - Tarrytown, NY

#### D.

This group of numbers represents the serial number of the car. Lets use VIN example VC55N063921 we can calculate about when the car was made. Go to table 1 for 1955 cars and then to the Norwood (N) line our serial number is 0063921 or 63921. The last car built in Jan 1955 was 55388 and the last car in Feb 1955 was 68985. So, our car was built sometime in February 1955. This information is especially helpful when trying to locate properly dated engines, rear ends, glass, etc for your restoration.

## Sheet Metal Fabrication Book

NEW

The craft of hand-forming sheet metal into compound curves and dashing fins and fenders is fast becoming a lost art. Author Eddie Paul overcame adversity to become a master at sheet metal fabrication, and in this book he gives readers the means to mold their own sheet metal creations. Paul's engagingly written book talks about the necessary tools and how to use them; how to choose, prepare and work with the right material; how to make forms and mock-ups, and much more. Soft cover, 160 pages, 8-1/4" x 10-7/8", perfect bound.

## 1955-57 Griffin Aluminum Cross-Flow Radiator Kit

- The Maximum Cooling Money Can Buy
- Replacement Radiator
- 2 Rows Of Horizontal 1-1/4" Tubes Gives Best Cooling Possible
- Increased Surface Area Over Down-Flow Radiators
- Bolts In The 6-Cylinder Position To Stock V8 Or CCI Tubular Core Supports
- Built-In Transmission Cooler With Fittings In Stock Bottom Tank Location
- Powerful Dual 10" Electric Fans
- Kit Includes: All-Aluminum Radiator W/Cap, Dual Fans W/Shroud, Fan Relay & Wiring Kit, Overflow Tank, Air Conditioning Condenser For 134A Refrigerant
- Requires Hoses P/N 18-26 & 18-308

This Chevy crossflow radiator kit will solve all of your cooling dilemmas. The radiator itself is made from 2 rows of 1-1/4" horizontal aluminum cooling tubes custom made for Classic Chevy by the best name in the business; Griffin Radiator. Cross-flow construction gives far greater cooling surface area than traditional down-flow radiators. The construction of this radiator will cool down the hottest small block or big block Chevy engine. The radiator core, straps and tanks are welded together for maximum durability. Automatic transmission cooling line fittings are in the stock location in the bottom tank, so readily available cooling lines may be used. No need for you to have any custom parts made! This complete kit includes a pre-mounted air conditioning condenser compatible with Vintage Air and other aftermarket air conditioning systems. Powerful dual 10" electric fans totaling 2780 CFM are secured to the back of the radiator with an all-aluminum shroud. All components are pre-mounted for ease of installation. Mounting is easy; just bolt the unit to a stock or tubular V8 core support. The unit is flanged so that it is positioned in front of the core support top bar. Use molded radiator hoses P/N 18-26 & 18-308 for a finished look except for LS and LT engines. Our Chevy Griffin aluminum cross-flow radiator kit is sure to keep your classic cool, no matter the displacement or horsepower!

## 1955-57 Griffin Aluminum Down-Flow Radiators

- Cools Down Even The Hottest Engines
- All Aluminum
- In-Line Construction For Best Air Flow

Our radiators are available in two series: Pro and HP. The Pro series features large 1" diameter cooling tubes for normal to moderate cooling needs. The HP series features 1-1/4" diameter tubes for greater cooling needs. V8 position radiators (flanges on radiator point to the front) mount behind the upper core support bar on stock V8 core supports. 6-cylinder position radiators (flanges on radiator point to the rear) mount in front of the upper core support bar on stock 6-cylinder core supports. These radiators bolt to a stock core support or CCI's tubular core support. Uses stock or aftermarket radiator cap.

## Which One Should I Buy?

Use the handy guide below to help choose the right power steering system for your classic:

**1** The overall best aftermarket steering system you can buy. Includes all items needed to complete the installation. This kit will give you better steering and road feel than any other system on the market.

**Major Advantage:** Best steering and road feel.

**2** A good second choice to the rack and pinion. It retains the original steering linkage and pitman arm. Road feel is second only to rack and pinion.

**Major Advantage:** Less expensive and fewer modifications to car required.

**3**  
**Major Advantage:** Same as #2 above.

### 1955-57 Late Model Pump Kit For Original Power Steering

53-95

797.99 kit

**4** Same as item #1 but does not include the steering pump, pump bracket or pulleys (you must supply).

**Major Advantage:** Best steering and road feel.

**5** For use with factory power steering cars. Eliminates the stock generator driven pump.

**Major Advantage:** Eliminates leaky original pump, allows conversion to alternator.

**6** Most closely duplicates the original power-assist steering. Pump not included; must use an original pump or #5 above.

**Major Advantage:** Requires least amount of modification and looks close to original.

## Tech Tips

When installing the 605, 670 or rack and pinion steering conversions, a different set of alignment specs must be used to avoid wandering and over-sensitive steering feel:

	1955	1956	1957
Caster Degrees:	+2-1/2 to 3-1/2	+2-1/2 to 3-1/2	+2-1/2 to 3-1/2
Camber Degrees: Pass-	-1/4	-1/4	-1/4
Driver-	0	0	0
Steering Axis			
Inclination Degrees:	3-1/2 +/- 1/2	3-1/2 to 4 1/2	3 to 4
Toe-In Inches:	1/8 to 3/16	1/8 to 3/16	1/8 to 1/4

## Battery Tender

- Safe, Reliable, Trouble Free Battery Care
- Developed To Maintain Batteries Not In Constant Use Or Storage

Automatically switches off after fully charging to storage charge constantly monitors the battery without the damaging effects of trickle charging. The initial charge cycle of the Battery Tender brings a battery to a full charge at approximately 14.4 volts about 1.25 amps. After a full charge is reached, the Battery Tender automatically converts to a float charger and monitors the battery at 13.6 volts. Although there is a constant voltage of 13.6 volts being applied to the battery, it is doing so at very little or no current. What this means to the user is safe, reliable, trouble free battery care. Equipped with 6' power cord, and 6' output cord with clamps, 5 year warranty.

## Battery Tender Waterproof 800 Charger

- Charges Battery & Maintains Proper Storage Voltage Without Damaging Effects Caused By Trickle Chargers

The Battery Tender Waterproof 800 is perfect for outdoor use. Its circuitry is totally epoxy encapsulated so it will perform even while submersed under water. The unit packs 800 milliamps of pure charging power yet it is no larger than the size of a standard computer mouse. You can use Battery Tender anywhere in the world (100-240VAC 50/60 Hz) and the unit is reverse polarity protected, spark proof and it complies to international safety standards (UL/CSA/CE). Like all Battery Tenders, it has a microprocessor (brain) that controls the charging of each battery so that your battery doesn't get "cooked" the way conventional chargers can do. This lightweight unit weighs only 1 lb. and carries a manufacturers' 2 year warranty.
